

FOR IMMEDIATE RELEASE

## **TextGuard™ Announces U.S.-EU Safe Harbor Framework Certification for all European Countries.**

*U.S.-EU Safe Harbor Framework Certifies TextGuard to do Business Europe*

**New York, NY – March 11<sup>th</sup>, 2011:** [TextGuard](#), the leading provider of mobile communication archiving and monitoring solutions, today announced it is now certified with the U.S.-EU Safe Harbor Framework to allow the transfer of information between the United States and Europe.

In order to bridge the differences between the privacy laws of the United States and Europe, the European Commission developed a "safe harbor" framework. The U.S.-EU Safe Harbor Framework, which was approved by the EU in 2000 and is an important way for U.S. organizations to avoid experiencing interruptions in their business dealings with the EU.

TextGuard, a patented mobile compliance solution, was developed for large regulated organizations to log, archive, review, extract, and supervise electronic communication on mobile devices. TextGuard supports Blackberry, Android, Windows and Apple iPhone. These messages include (SMS) text messages, pin-to-pin messages, BlackBerry Messenger Instant Messages as well as third-party Instant Messages. [VoiceGuard](#) was introduced last fall and also captures and archives any voice conversations on the Mobile Device. All mobile messages are identified, collected, archived and stored remotely or can be exported in any format to an existing data vault to meet mobile e-discovery requirements as defined by the [Federal Rules of Civil Procedure \(FRCP\)](#) and [FINRA](#).

Todd Cohan, CEO and founder, explained that even with the strict adherence TextGuard has with Privacy and compliance in the United States, many existing customers have offices overseas and require the transmission of critical data to and from Europe. Certifying TextGuard with the U.S.-EU Safe Harbor Framework is the next logical step in ensuring our customers that we provide "adequate" privacy protection as defined by the directive.
